

# Introducing XT Amplify

Maximize the value of your technology investment

As healthcare continues to emerge from the operational and economic impacts of the pandemic, pharmacy leaders need solutions that will address evolving and complex needs today and into the future. The XT Amplify program delivers continuous innovation designed to maximize technology investments at the points of care and within pharmacy while helping healthcare facilities to achieve the aspirational clinical and operational outcomes outlined in the industry-defined vision of the Autonomous Pharmacy.

# A Multi-Year Program Designed to Deliver Continuous, Outcomes-Centric Innovation

Pharmacy and nursing leaders understand the value a technology-driven medication management strategy for patient care. But installing a new infrastructure and the change management that comes with that can be very challenging.

XT Amplify is designed to maximize the value of your existing technology investments. This multi-year program provides a path to implement new high-value, innovative hardware, software, and services solutions to amplify your XT Automated Dispensing System portfolio through frequent and regular releases.

## Delivering Value for Your XT Product Portfolio

**Continuous innovation  
delivery to maximize the value  
of XT investments**

**Drive outcomes now and in the  
future that wouldn't have been  
possible with just XT**

**Immediate access to  
innovation, instead of having  
to wait for new cabinets**

## XTExtend

This comprehensive console swap provides a high level of security while enhancing the nurse user experience. XTExtend is designed to be backward compatible, strengthening interoperability within the healthcare facility, while maximizing the value of current technology.

## MedChill

Improve the safety and security of individual, temperature-controlled medications with this secure device for compatible refrigeration. MedChill is designed to support item-level inventory visibility to maximize expiration dates to reduce waste and stockouts at the points of care and within pharmacies.

Refrigerator purchase not required.

## SupplyXpert

This inventory management software is designed to manage medical supplies housed within the XT Supply cabinet and open-shelf locations, providing insights into stockout events, stock value, key performance indicators, and optimization recommendations. SupplyXpert extends the benefits of existing equipment while helping you manage the increasing costs of medical supplies.

## ServerScale

The on-premises OmniCenter virtual server solution is now available in a subscription format, allowing customers to stay current with the latest operating systems. ServerScale ensures infrastructure readiness today, while providing a foundation for your evolving and expanding health system into the future.

## CarePlus

This subscription-based offering combines technology-driven automation, connected intelligence, and expert services to optimize adoption, utilization, and the overall performance of your automated dispensing system technology.

---

## The Journey to Safer, More Efficient, Medication Management

Regardless of where you are in adoption and utilization of XT Automated Dispensing System technology, XT Amplify helps to solve important challenges today and into the future, while supporting your journey toward the Autonomous Pharmacy. This industry-defined vision seeks to replace manual, error-prone activities with automated processes that are intended to be safer and more efficient.

See how you can maximize your technology investment and enhance outcomes.
