IVX Workflow: A Complete Solution for Your VISN and VAMC

Omniceil is pleased to partner with our VA customers to drive quality in sterile IV compounding while adhering to VHA Directive 1108.12. IVX Workflow, offered through IV Workflow Service, enables safety, accuracy, and efficiency:

Automate Documentation

- Track lot and expiration of CSPs
- Streamline record keeping

Promote Proper Aseptic Technique

- Touchless advance with no additional equipment required
- Limited interference of first air

IVX Workflow

Omniceil® IVX Workflow is an innovative sterile compounding workflow solution that incorporates integrated barcode scanning, gravimetric or volumetric verification, multi-spectral imaging, photo documentation, and label printing. It provides a compact all-in-one package designed for safe, accurate, and streamlined IV sterile compounding, verification, and documentation.

IV Workflow Service

IV Workflow Service provides the customized support your pharmacy needs to optimize sterile iv compounding, including formulary and protocol set up at implementation, data driven insights and recommendations and access to clinical strategists to support ongoing success with the technology.

For information and flexible quoting that meets government contracting needs, please contact your Omnicell account manager.
